September 2018 – May 2019  
Buenos Aires, Argentina (Remote)

- Worked for the VANS Customs e-commerce site team (<https://www.vans.com/custom-shoes.html>)
- Migrated application features from an Adobe Experience Manager / jQuery setting to Vue / Vuex
- Transformed app UI to allow product customization options created by featured artists and brands such as Disney and Harry Potter
- Refactored product personalization logic to be aligned with marketing campaigns
- Created end-to-end tests for several site features

Tech: ES6, HTML, SCSS / Sass, jQuery, Vue, Vuex, RequireJS, Mocha, Chai, Puppeteer

**GöK Innovation Agency** – <https://gok.agency>  
**Frontend & Mobile Developer**

April 2018 – September 2018  
Maracaibo, Venezuela

- Developed cross-platform mobile applications for company clients
- Set up Google Firebase document-oriented databases, authentication, cloud functions and storage tools to serve the mobile apps through the Firebase SDK
- Integrated ERP services and APIs provided by the company clients to the mobile apps
- Built and maintained internal admin web apps

Tech: ES6, HTML, SCSS / Sass, React Native, React, Angular, Redux, Firebase

**Freelance Work**  
**Frontend & Mobile Developer**

August 2017 – April 2018  
Maracaibo, Venezuela

- Built landing pages and web apps based on client-provided UI design and existing backend services
- Developed features for React Native apps and connected Google Firebase services

Tech: ES6, HTML, SCSS / Sass, React Native, React, Gatsby, Angular, Redux, Firebase

**Humbee Partners** – <https://humbee.co>  
**Project Manager**

August 2017 – April 2018  
Maracaibo, Venezuela

- Led two application development teams encompassing mobile app, frontend and backend engineers

# César Gutiérrez Olivares

DOB: 17.12.1992

Location: Berlin, Germany

[cesar.codes](https://cesar.codes)

- Managed food delivery app release in Maracaibo as well as maintenance and product development for a transportation app
- Built backlog and planned development sprints based on gathered business requirements
- Carried out technical interviews for candidates

**Humbee Partners** – <https://humbee.co>  
**Frontend Developer**

February 2017 – August 2017  
Maracaibo, Venezuela

- Created user and driver web apps for a transportation business with features such as ride history with Google Static Maps, profile and credit balance management and online payments
- Developed a ride fare calculator web app with Google Maps API and consuming proprietary services
- Built tools for the Admin and Corporate Services Panels to allow real-time ride tracking, surge pricing, location/time-based discounts, reports generation and user management.
- Created Admin Panel web app for a food delivery business, developing features for both delivery companies and store owners to handle their operations, staff, stock, pricing, generate sales reports, view user activity and set up location-based discounts.

Tech: JavaScript, HTML, CSS, SCSS / Sass, Angular, jQuery, Angular Material, Bootstrap, Google Maps API, Firebase

## PROJECTS

---
